

PRECISE ANATOMICAL DISECTION

Maximize your surgical technique
and optimize outcomes.

FINE DISSECTION
NERVE PRESERVATION
TISSUE INTEGRITY

Seal Vessels As You Cut

Experience a clean surgical field with
exceptional visualization for the safe
dissection of nerves and critical anatomy.
No muscle excitation, no electric current.

*One of the advantages is that there is a tactile feedback in
dissecting tissue that's not lost with this instrument. What
is gained is a sharper scalpel too and a more sparing surgical
technique so it results in a very smooth surgical process.*

— Dr. Charles Cummings, MD

Surgically Sharp

Precise excision of metastatic
disease, unparalleled neural
protection and preservation of
vital anatomical structures.

Thermal Hemostasis

Heat from the scalpel blade is
transferred to incised tissue
within a narrow margin and no
undesirable spread.

Maximum Control

Control the rate, depth, and
angle of dissection along with
blade temperature - while
receiving accurate visual and
tactile feedback.

40 Years of Clinical History Meets Leading Edge Technology

The Scalpel Blade

A 5-Layer Laminate Composition of Copper and Stainless Steel

Advanced micro-electric circuitry applied to the blade surface enables immediate heating to a maximum of 300 degrees Celsius. The patient is insulated from the electric current, no grounding pad is required, and no muscle excitation occurs.

Shaw Scalpel® Ordering Information

70130006	SG6 Controller
70139050	Scalpel Handle (1)
70239050	Scalpel Handle (6)
70235810	#10 Scalpel Blade (10 per box)
70235812	#12 Scalpel Blade (10 per box)
70235815	#15 Scalpel Blade (10 per box)
