

Extract salivary stones.

NGage[®] SALIVARY STONE EXTRACTOR

Illustration by Lisa Clark

Dual performance

The stone extractor can hold stones like a basket and release them like a grasper, providing optimized control throughout the entire procedure.

Ergonomic

The handle is easy to use and allows you to deploy the stone extractor single-handedly.

Durable

The stone extractor's nitinol material is flexible and kink resistant.

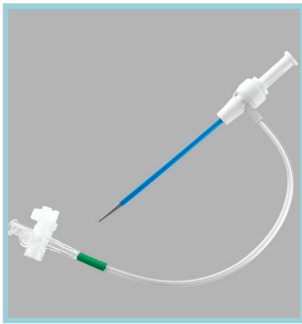

NGage®

SALIVARY STONE EXTRACTOR

Used for manipulation, entrapment and extraction of calculi and other foreign bodies in the salivary ducts, and to minimize migration of salivary stones during interventional procedures.
