

Dilate salivary duct strictures.

Advance[®]

SALIVARY DUCT BALLOON CATHETER SET

Illustration by Lisa Clark

High-strength

The high-strength, minimally compliant material allows for the complete dilation of the stricture.

Minimally invasive

The flexible, low-profile design supports minimally invasive intervention through radial dilation.

Multi-modal visualization

The catheter is compatible with direct endoscopic visualization or ultrasound imaging based on physician preference.

Advance®

SALIVARY DUCT BALLOON CATHETER SET

Used for the dilation of strictures in the submandibular and parotid salivary ducts.

The balloon is constructed of an extra-thin wall and high-strength material that is intended to be used with sialendoscopic visualization in the submandibular salivary ducts.

Components

- Advance Salivary Duct Balloon Catheter
- Wire guide
